To Whom It May Concern:

Even though we are a governmental entity, the operations of water division of this entity can be defined as a commercial activity. The primary operation of this agency is to provide the delivery and sale of fresh water and wastewater services to the general public.

Radio equipment will be used to monitor and control the various infrastructures associated with the delivery and sale of water and wastewater services. This includes the monitoring of water tanks, wells, pumping stations, pipelines, metering equipment, and other necessary equipment. Fees are associated with all of these services and therefore would be defined as a commercial activity. We will utilize these frequencies for commercial activity within the scope and intent of FCC Rule 90.35.

Sincerely,
